

TSE Notes

Instillation: TSE Notes is a portable application. It comes in a zip file and all you need to do is move it to the correct location and unzip it.

It is located in our L2 documents in the folder [Perry Software](#)

Steps:

- 1) Download the zip file and move it to your home directory: C:\Users\sesa123456
- 2) **If you have previously installed TSE Notes you will need to delete the old directory** C:\Users\sesa123456\TSENotes. (Do not worry, your database is located somewhere else, and this will not affect your data.). If this is a new install you may skip this step.
- 3) Then use 7-zip to extract it.

4) This will create the folder TSENotes, click on the folder to go inside and you will see:

 app		10/10/2024 1:00 PM	File folder	
 runtime		10/10/2024 1:00 PM	File folder	
 TSENotes.exe		10/9/2024 7:53 PM	Application	599 KB

You can double click TSENotes.exe to start the application. It is also a good idea to right click on the file and create a short cut on your desktop

5) Once you double click on TSENotes.exe the app will launch for the first time and automatically create your database
